

# Coding Club

Week 2: HTML

Before we do HTML...

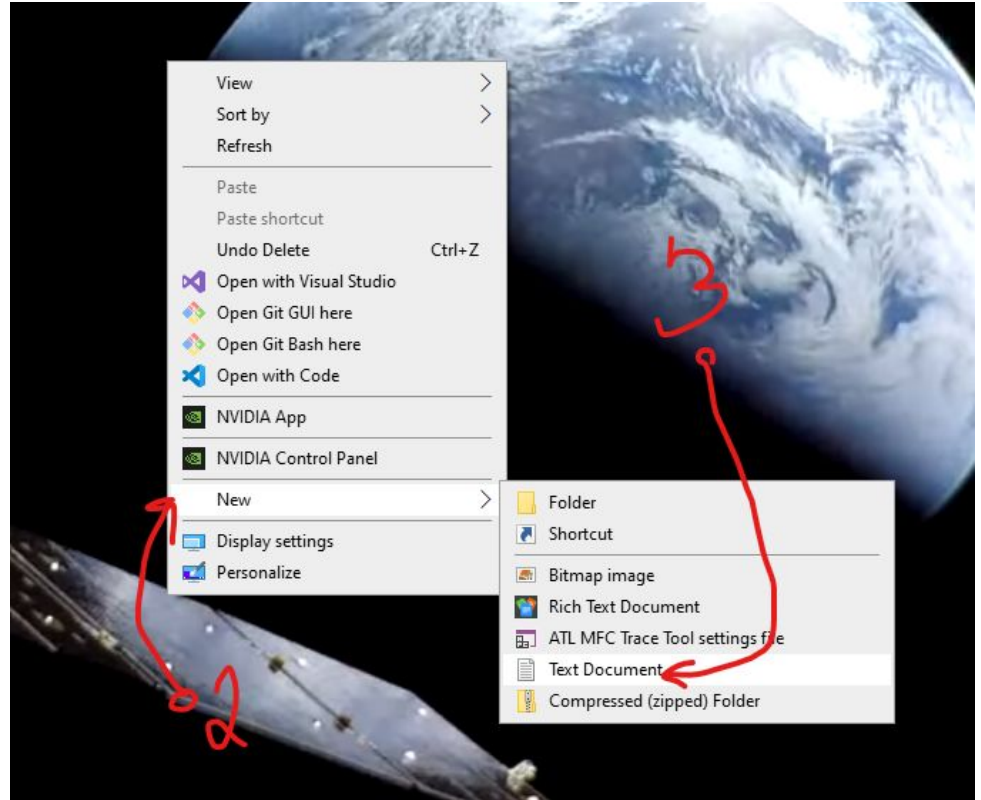

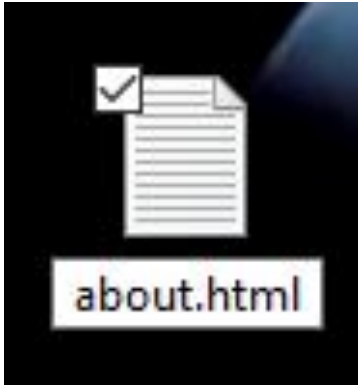

# Show file extensions

1. Open file explorer
2. Go to “view”
3. Check “File name extensions”

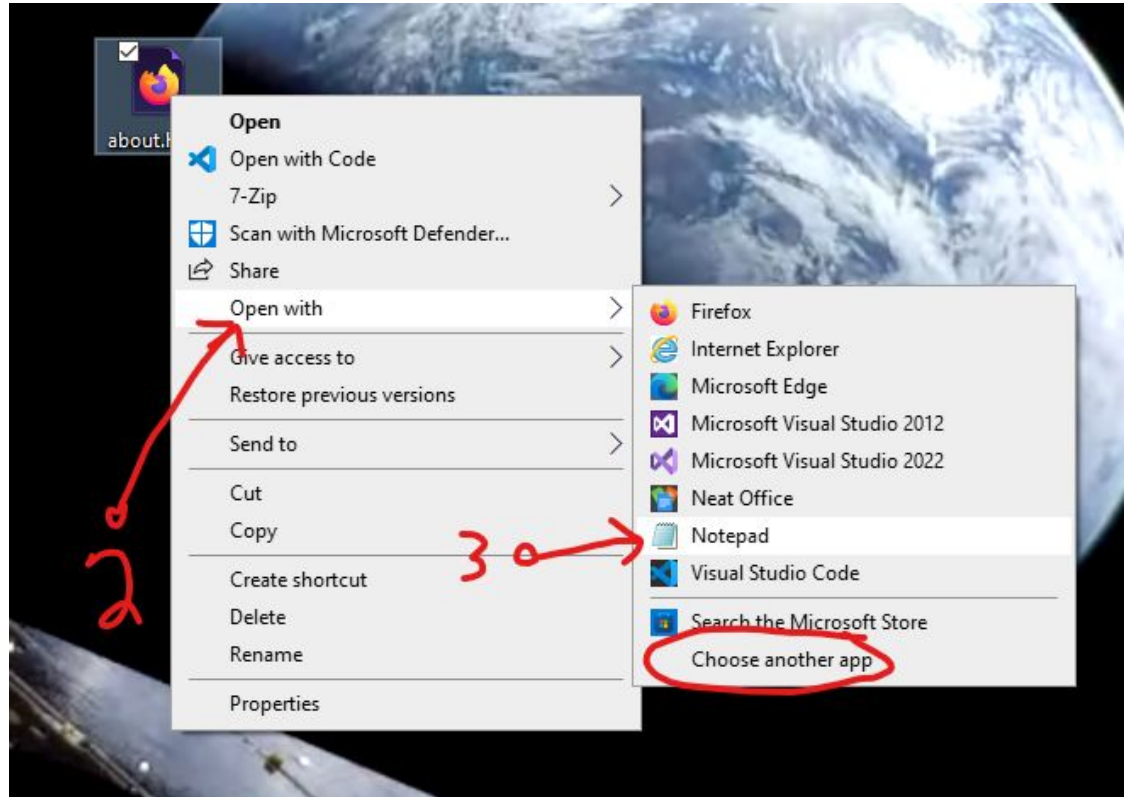

# Make an HTML file

1. Right click
2. Click “New”
3. Click “Text document”
4. Name the file “about.html”
  - a. Make sure you remove “.txt”

# Open in notepad

1. Right click “about.html”
2. Click “Open with”
3. Click “Notepad”
  - a. You may have to click “Choose another app” and find it in that menu

Now we can HTML

<tag> contents </tag>

<tag [argument]>

Contents

</tag>

<p>

Any text here will  
display normally.

</p>

`<h1>`

**Any text here is big  
and bold.**

`</h1>`

```
<!DOCTYPE html>
<html>
  <head>
    <title>About me</title>
  </head>
  <body>
    <h1>This is a page about me!</h1>
    <p>
      My name is John Jacob Jingle
      Heimer Schmidt
    </p>
  </body>
</html>
```

```

```

```
<a href="google.com">  
    Google homepage!  
</a>
```

```
<a href="google.com">  
    
</a>
```

Let's make a website!

```
<!DOCTYPE html>
```

```
<html>
```

```
    <head>
```

```
        <title>About me</title>
```

```
    </head>
```

```
    <body>
```

```
        <h1>Connor Layson</h1>
```

```
        <p>
```

```
            I am 20 years old.
```

```
        </p>
```

```
        <a href="newberrycodingclub.com">
```

```
            This is my favorite site!
```

```
        </a>
```

```
        
```

```
    </body>
```

```
</html>
```

Crtl + S

Open with a browser!
