1

This week's event is...

A game jam!

Game jam

Article Talk

A **game jam** is an event where participants try to make a game, usually a [video game](#), from scratch.^[1] Depending on the format, participants might work independently, or in teams. Event duration varies widely, commonly lasting 24, 48, or 72 hours, 1-2 weeks, or a full month. Participants are generally

What will we be
doing?

All members will be working together as a team to make a text-based game using Python.

The game can be any length and have whatever story or mechanics the members can make within the allotted time.

The allotted time is one week.

Specifics

Members will be working together using the Git and GitHub skills we learned in the second meeting to collaborate on the project.

It is also required to make a webpage for the game. This can be as simple or as complex as the team wants, but must contain a description of the game and how to play.

The game must be programmed in Python.

Now for the theme

Your game must be of
the following genre:

Science Fiction
